**Key Outcomes**

Water Trail staff is developing a Strategic Implementation Plan at the direction of the Water Trail Project Management Team. At the December 1, 2017 Water Trail Implementation Meeting, members of the Water Trail Advisory Committee and other meeting attendees provided expert guidance to ensure recommendations proposed in Implementation Plan meet the needs of existing users and potential users including those with disabilities, while encouraging public safety and resource protection.

The Strategic Implementation Plan will inventory existing water access facilities and programs, identify potential for access enhancements and future opportunities, and rank locations for investment and eventual designation into the Water Trail. Recommendations will be based upon information gathered through a culmination of site visits and research, collaboration with site managers, and consultation with resource and permitting agencies and Water Trail Advisory Committee members and stakeholders.
