

EXHIBIT 1

Project Region for Wildland Weed Worker Handbook California Exotic Pest Plant Council & Aquatic Outreach Institute September 2003

The handbook will serve watershed stewardship projects in many of the San Francisco Bay Area's watersheds. Mostly these are creeks and rivers feeding directly into the Bay, but includes other projects, such as those along the Pacific Ocean coast through the Golden Gate National Recreation Area, San Mateo County Parks, and California State Parks, as well as projects along the Bay shore, such as the restoration at Heron's Head Park in San Francisco.
