

- Legend**
- ?.....? Active or potentially active fault, location approximate, queried where uncertain
 - 50 foot fault setback
 - Areas of highest liquefaction potential
 - Areas of moderate or unknown liquefaction hazard
 - 30-foot trail setback from bluff edge
 - Mass movement/unstable and dangerous slope (slope > 100%)
 - Steep and potentially unstable slopes (slope 50% - 100%)
 - Very high erosion potential (slope 15% - 50%)
 - Residential footprints
 - Proposed residential development site
 - Designated for future residential development
 - Joint Proposal Area
 - Goleta Jurisdiction
 - County Jurisdiction
 - University Jurisdiction
 - Subarea
