Mr. Bosco,

I am writing to ask your support for the HUNTINGTON BEACH WETLANDS CONSERVANCY'S grant request to complete the construction of the WILDLIFE CARE & EDUCATION BUILDING at the Wetlands & Wildlife Care Center. When completed, the building will provide a fully equipped veterinary hospital for wildlife and enough space for a classroom and a visitor's education area.

In 2001 the Conservancy obtained a \$600,000.00 grant from the Wildlife Conservation Board to construct this desperately needed building. It took them several years to obtain all the necessary plans and entitlements required to begin construction. From 2001 until construction began in 2005 the cost of construction and materials have skyrocketed. As a result, the building will not be able to be completed within the original budget.

In addition to the Wildlife Conservation Board, the project has received assistance from the City of Huntington Beach, the AES power plant, Chevron, Southern California Edison, local businesses and hundreds of donations from the general public.

I urge you to support this very worthwhile project.

Sincerely,

A handwritten signature in blue ink that reads "Tom Harman".

RE: Huntington Beach Wetlands Conservancy Request for \$240,000 for construction of the Wildlife Care & Education Facility - SUPPORT

I write today to offer my wholehearted support for the Huntington Beach Wetlands Conservancy's (HBWC) request for additional funding from the Coastal Conservancy Board. I urge you to approve funding for construction of their Wildlife Care & Education facility. It is a truly worthy project.

As you are aware, HBWC has been working for many years to provide our community with a wildlife care and education center. The existing wildlife care center is not large enough to accommodate the full demand for its services or the full range of services to treat and rehabilitate injured wildlife. No education center exists to interpret the coastal resources of the area. These efforts have included countless hours of volunteer time to acquire the land and to secure funding.

In 2001 the Wildlife Conservation Board granted HBWC \$600,000 for construction of their facility. Since receiving this grant HBWC has been working hard to develop the required plans and to gain the proper entitlements to move forward with its construction. During that same period, unfortunately, the costs to construct this facility have skyrocketed, leaving them with a \$240,000 shortfall for construction of their building.

Once open, this facility will provide vital care services for the wildlife of coastal Southern California, educate our local community on the valuable role played by our coastal wildlife, and provide an opportunity for the more than 11,000,000 visitors who come to Huntington Beach each year to learn about the rich ecosystem of this area.

The Wildlife Care and Education facility project has received broad community support including donations from the city, business community, and private donors. Despite this energetic support, the need for an additional \$240,000 for construction of the facility remains. Please help complete this worthwhile project by funding the remaining \$240,000.

Sincerely,

Larry B. McKenney, Manager  
Watershed & Coastal Resources Division

**RE: Huntington Beach Wetland Conservancy Request for an additional \$240,000 for construction of their Wildlife Care & Education Facility - SUPPORT**

Dear Chairman Bosco:

I write today to offer my wholehearted support for the Huntington Beach Wetlands Conservancy's (HBWC) request for additional funding from the Wildlife Conservancy Board. We urge you to do all within your power to assist them with funding for construction of their Wildlife Care & Education facility. It is a truly worthy project.

As you are aware, the HBWC has been working for many years to provide our community with a wildlife care and education center. These efforts have included countless hours of volunteer time to acquire the land and to secure the funding.

In 2001 the Wildlife Conservancy Board granted the HBWC \$600,000 for construction of their facility. Since receiving this grant the HBWC has been working hard to develop the required plans and to gain the proper entitlements to move forward with its construction. During that same period, unfortunately, the costs to construct this facility have skyrocketed, leaving them with a \$240,000 shortfall for construction of their building.

Once open this facility will provide vital care services for the wildlife of coastal Southern California, it will educate our local community on the valuable role played by our coastal wildlife, and it will provide an opportunity for the more than 11,000,000 visitors who come to Huntington Beach each year to learn about the many wonderful creatures that inhabit this area.

The Wetlands Care and Education facility project has received broad community support including donations from the city, the business community, and private donors. Nonetheless, the need for the additional \$240,000 for construction of the facility remains.

Please help us make this dream a reality by funding the remaining \$240,000.

Sincerely,

## CITY OF COSTA MESA

CALIFORNIA 92628-1200

P.O. BOX 1200

FROM THE OFFICE OF THE MAYOR

June 6, 2006

Mr. Douglas Bosco  
Chairman  
State Coastal Conservancy  
1330 Broadway, #1100  
Oakland California 94612

Dear Mr. Bosco:

I am writing to ask your support for the HUNTINGTON BEACH WETLANDS CONSERVANCY'S grant request to complete the construction of the Wildlife Care & Education Building. This building, located at the Wetlands & Wildlife Care Center, will provide a fully equipped veterinary hospital for wildlife and enough space for a classroom and a visitor's education area. Injured birds—gulls, herons, and egrets, among others—are brought to the Wildlife Care Center from many of the cities, including Costa Mesa. In addition, the Center receives and cares for injured raccoons, opossums, and other wild animals from the area encompassing coastal Orange County.

In 2001, the Conservancy obtained a \$600,000 grant from the Wildlife Conservation Board to construct this much needed building. It took several years to obtain all the necessary plans, permits and entitlements required to begin construction. From 2001 until construction began in 2005, the cost of construction and materials have skyrocketed. As a result, the building will not be able to be completed within the original budget.

In addition to the Wildlife Conservation Board, the project has received assistance from the City of Huntington Beach, the AES power plant, Chevron, Southern California Edison, local businesses and hundreds of donations from the general public.

I urge you to support this very worthwhile project.

Sincerely,

Allan R. Mansoor  
Mayor

**SUBJECT: Huntington Beach Wetlands Conservancy Request for \$240,000 for Wildlife Care & Education Facility – SUPPORT**

Dear Chairman Bosco:

I am writing today on behalf of the Friends of Harbors, Beaches and Parks (FHBP), a non-profit organization seeking to provide support and funding for projects which will complete our "Green Vision" in Orange County. Among the most needed projects in our coastal county is one which cares for the many sick and injured birds and animals, innocent victims of all of the hazards of an urban coastal society. Since a major oil spill disaster in the 1990s, this group of volunteers has swung into action to provide such a facility.

We urge you to assist with funding for construction of the new Wildlife Care & Education facility. This is a remarkable group of truly dedicated volunteers who manage the facility and give tender loving care to the helpless creatures. Their caring goes a long way toward educating the public about the valuable role played by our coastal wildlife and wetlands.

In 2001 the Wildlife Conservation Board granted the HBWC \$600,000 for construction of their facility. Since then HBWC has worked hard to move forward efficiently with its construction. During that same period, however, the costs of materials has grown substantially leaving a \$240,000 gap.

The Wildlife Care & Education facility project has received broad community support including donations from the city, the business community, and private donors. These supporting individuals and groups are needed on a continuing basis for operation and maintenance as well. We hope you can fill this present \$240,000 gap in funding and help make this exemplary facility a completed reality soon.

Sincerely,

Jean H. Watt  
President, FHBP

In 2001 the Conservancy obtained a \$600,000.00 grant from the Wildlife Conservation Board to construct this desperately needed building. It took them several years to obtain all the necessary plans and entitlements required to begin construction. From 2001 until construction began in 2005 the cost of construction and materials have skyrocketed. As a result, the building will not be able to be completed within the original budget.

In addition to the Wildlife Conservation Board, the project has received assistance from the City of Huntington Beach, the AES power plant, Chevron, Southern California Edison, local businesses and hundreds of donations from the general public.

I urge you to support this very worthwhile project.

Sincerely,

Lois Sheppard, volunteer since 2002 at WCC

Mr. Bosco,

I am writing to ask your support for the HUNTINGTON BEACH WETLANDS CONSERVANCY'S grant request to complete the construction of the WILDLIFE CARE & EDUCATION BUILDING at the Wetlands & Wildlife Care Center. When completed, the building will provide a fully equipped veterinary hospital for wildlife and enough space for a classroom and a visitor's education area.

In 2001 the Conservancy obtained a \$600,000.00 grant from the Wildlife Conservation Board to construct this desperately needed building. It took them several years to obtain all the necessary plans and entitlements required to begin construction. Oakland, CA 94612

Dear Mr. Bosco,

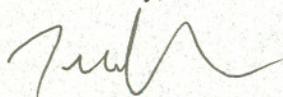

I am writing to ask your support for the HUNTINGTON BEACH WETLANDS CONSERVANCY'S grant request to complete the construction of the WILDLIFE CARE & EDUCATION BUILDING at the Wetlands & Wildlife Care Center. Once completed, this vitally needed building will provide a fully equipped veterinary hospital for rehabilitation of our native wildlife, plus space for a wide variety of educational programs.

In 2001 the Conservancy obtained a \$600,000.00 grant from the Wildlife Conservation Board to construct this desperately needed building. It took several years to obtain all the necessary plans and entitlements required to begin construction. From 2001 until construction began in 2005, the cost of construction and materials have skyrocketed. As a result, the building will not be able to be completed within the original budget.

In addition to the Wildlife Conservation Board, the project has received assistance from the City of Huntington Beach, the AES power plant, Chevron, Southern California Edison, local businesses and hundreds of donations from the general public. We ask now for your help.

From school educational programs, to rehabilitating endangered Brown Pelicans, the completion of the Wildlife Care & Education Building will enable the Wetlands & Wildlife Care Center to expand and improve its' range of services for our communities. This building will be a valuable asset to our citizens, our children, and our native wildlife. I urge you to support this very worthwhile project.

Sincerely,

Terri Oba

Dear Mr. Bosco,

I am writing to ask your support for the Huntington Beach Wetlands Conservancy's grant request to complete the construction of the wildlife care & education building at the Wetlands & Wildlife Care Center. When completed, the building will provide a fully equipped veterinary hospital for wildlife and enough space for a classroom and a visitor's education area.

I am a volunteer at the care center and I see first hand the enormously valuable service the center renders to sick and injured wildlife that are brought to us. We are, however, limited to relatively primitive facilities and often have to depend on nearby veterinary hospitals for any procedures beyond the very simple. The Wildlife Care & Education Building will give us the ability to offer full treatment to sick and injured wildlife as well as offering educational programs to other rehabilitators and the general public.

I urge you to support this very worthwhile project.

Thank you for your consideration.
