RE: Trinidad Pier Reconstruction Project

Dear Chairman Bosco:

I am writing to express my support for the **Trinidad Pier Reconstruction Project** (Project) being proposed by the Cher-Ae Heights Indian Community of the Trinidad Rancheria (Tribe) for funding consideration by the California Coastal Conservancy Grant Program.

The Project, when completed, will enable the Tribe to reconstruct the pier/dock structure in Trinidad harbor and bring it into compliance with non-point source pollution requirements of the California Water Resource Quality Control Board. Pollution from discrete sources on the existing pier/dock facility will be substantially addressed by the reconstruction work. It is my understanding that the Tribe is also partnering with the City of Trinidad to address other non-point source contaminants in the waters of Trinidad.

Additionally, reconstruction of the pier will improve the economic development opportunities for the Tribe, the commercial fishermen who use the facility and the greater Trinidad community. The Pier's ancillary restaurant, boat launching facilities, gift shop and other commercial properties will also see economic benefit from the completed Project.

I believe the Project to be one of extreme importance to the Tribe and the community of Trinidad that will provide long-term environmental and economic benefits. I am pleased to have this opportunity to extend my strong support for the Project.

Sincerely,

WESLEY CHESBRO
State Senator, Second District

RE: Trinidad Pier Reconstruction Project

Dear Mr. Bosco

The Trinidad City Council unanimously supports the Trinidad Pier Reconstruction Project (project) being proposed by the Cher-Ae Heights Indian Community of the Trinidad Rancheria (Tribe) for funding consideration by the California Coastal Conservancy Grant Program.

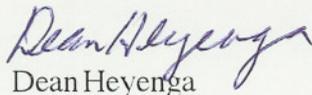

The project when completed will enable the Tribe to reconstruct the pier/dock structure and bring it into compliance with non-point source pollution requirements of the California Water Resource Quality Control Board. Pollution from discrete sources on the existing pier/dock facility will be substantially addressed by the reconstruction work. The Tribe is also partnering with the City of Trinidad to address other non-point source contaminants in the waters adjacent to Trinidad, which have been designated a Critical Coastal Area and an Area of Special Biological Significance.

Additionally, reconstruction of the pier will improve the economic development opportunities for the Tribe, the commercial fishermen who use the facility and the greater Trinidad community. The Pier's ancillary restaurant, boat launching facilities, gift shop and other commercial properties will also see economic benefit from the completed project.

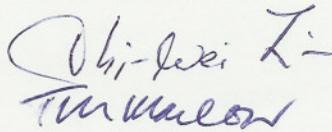

We believe the Project to be one of extreme importance to the Tribe and the community of Trinidad that will provide long term environmental and economic benefits. We are pleased to have this opportunity to extend our strong support for the project.

Sincerely,

Trinidad City Council
