

OVERVIEW

Over 10 years ago, the Bay Bridge design team identified a unique opportunity to create a park that provides a memorable gateway to Oakland and the East Bay and offers an unprecedented way to experience the Bay and the new bridge.

Gateway Park Area

New alignment of Bay Bridge east span

The new Bay Bridge East Span, currently under construction, will offer one of the most spectacular bicycle and pedestrian experiences in the world, connecting Oakland to Yerba Buena Island. Gateway Park will be a starting point for that journey.

Representatives of nine agencies are working to explore the possibilities of a new park for local residents, commuters, businesses, international travelers, visitors, environmentalists, boaters, cyclists and more.

From February to September 2010, we will agree on goals, target activities essential to the park and consider early design concepts. At the end of this phase of work, a Project Study Report will lay out the bold ideas and multiple coordinated steps to the realization of Gateway Park. The report will also set forth the key steps for the next phases: design, engineering, funding, and construction. **With the completion of the Bay Bridge East Span targeted for 2013, this is the time to consider ideas, cultivate innovative approaches and design a park worthy of the site's unique character.**
