Dear Mr. Gibson:

The County of San Diego Department of Parks and Recreation (DPR) supports the pursuit of funding for additional technical analysis for the San Elijo Lagoon Restoration Project (SELRP). DPR understands that funding will be used to implement additional modeling of dredged material disposal and biological impacts, support ACOE permitting (404 (b) 1 analysis), and analyze greenhouse gas emissions. DPR is the lead CEQA agency for the SELRP and owns 567 acres within the SELRP study area. The additional analysis and information will ensure the environmental analysis of the SELRP is complete and robust.

If you have any questions concerning how DPR can further support this project, please contact Megan Hamilton, Group Program Manager at megan.hamilton@sdcounty.ca.gov or (858) 414 6347.

Sincerely,

BRIAN ALBRIGHT
Director

RE: Support Letter for San Elijo Lagoon Restoration Project Funding

California State Parks (CSP) would like to express support for funding additional technical studies in support of the San Elijo Lagoon Restoration Project (SELRP). CSP understands that the funding will be used to develop better models of the offshore and nearshore environment with regard to sand placement and movement, support ACOE permitting (404 (b) 1 analysis), and analyze greenhouse gas emissions. CSP strongly supports the SELRP and will directly benefit from these studies as they will improve our understanding of the beach dynamics and support efforts to conserve our nearby campground and beaches.

If you have any questions concerning how State Parks can further support this project, please contact Darren Scott Smith, Environmental Scientist at (619) 952-3895

Sincerely,
