Amy and Megan,

Separate from any discussions our respective legal counsel may be having, I am again requesting that an item be placed on the agenda at the February 2nd Conservancy meeting to provide a substantive update regarding the "Sequences 1 and 2" project, along with an action item for them to consider approval of the work now being performed, which does not include the expressly stated tasks and deliverables cited as justification for approving the Prop 12 funds, or accomplish the goals highlighted by board members in approving the funds.

The importance of such an update is reinforced by CDFW's confirmation yesterday that they knew well before the May 27, 2021 meeting that \$1.69 million would be substantially insufficient to complete final design and permitting for the Ballona Wetlands Restoration Project.

Additionally, the project update page should be updated, as the information posted there is now four months old. It has been 603 days since funds were authorized for public engagement and not a single public engagement event has occurred.

Regards,

Walter
